

OZ Tableware are committed to new product developments in chafing fuel to ensure that you have the best available products to meet your needs.

OZ HEAT LIQUID CHAFING FUEL

The Original and The Best Since 1994

RECYCLED CANS

The high quality tin plate used to manufacture our cans is made from recycled material

CANS CAN BE RECYCLED

The cans can be recycled as long as the wick inside has been removed.

RECYCLED PACKAGING

Our cartons are all made from Recycled Material and can be recycled as long as they are also put out for recycling.

VISIBLE FLAME

Flame burns with a blue/red tint making it easily visible preventing accidents.

NON FLAMMABLE & NON COMBUSTIBLE

OZ HEAT's fuel formulation using *Diethylene Glycol* means that the product is non flammable and non combustible. When tested under Australian standards using the open cup method, NO FLASH POINT was determined, making OZ HEAT the safest food heating fuel alternative.

NON SPILL & NON DRIP

OZ HEAT's design has a special fuel holding reservoir. Should the container be turned side on or knocked over, the fuel is caught in the reservoir avoiding any spillage.

NO SPILL

EASY TO OPEN

RESEALABLE & EASY TO OPEN

OZ HEAT has a plastic plug with a convenient lever that is easy to open and re-seal making it easier and more efficient than screw caps.

ECONOMICAL 100% FUEL USAGE

OZ HEAT's efficient wick design can be re-lit and used time and time again giving you 100% fuel usage preventing wastage and giving you value for money.

CONTAINER STAYS COOL

When alight, the container does not become too hot to touch. Thus avoiding accidents, burn injuries and time loss due to injury.

DOES NOT EVAPORATE

If left uncapped, OZ HEAT Buffet Fuel will not evaporate like alcohol based fuels.

ODOURLESS

The fuel used is 100% odourless meaning that there are no toxic smells competing with the aroma of your food.

NO STORAGE OR TRANSPORT RESTRICTIONS

Unlike flammable gel and alcohol based fuels which must be stored in a special 'Dangerous Goods' area, OZ HEAT Buffet Fuel is a non-hazardous food heating fuel allowing it to be stored in any location cutting down your insurance premium and freight costs.
